There are a lot of mobile apps like Instagram, Amazon, Kucoin, Facebook, LinkedIn, Binance, Trust Wallet, metamask etc., but no app can connect all people on one platform. 1000PDF aims to tackle that problem and change the world by connecting people using a new technology that solves it all..

### **SOLUTION**

Just like the world is revolving, and change is occurring daily. The world needs a technology as we advance that can include all the functions of e-commerce platforms, social networks, exchanges and crypto

wallets where users can buy and sell educational materials affordably and profitably, making online payments with crypto, make friends, find jobs, exchange and store cryptocurrencies. 1000PDF will have all these functions in one place.

### **VISION AND MISSION**

The details of the business model, vision, mission, and terms of service are the rules that the user agrees to follow in order to use this service. It is a bilateral statement of liability and regulations of use between the service provider and the customer.

### **TECHNOLOGY AND SYSTEM ARTICULTURE**

1000PDF token is a BEP-20 token built on the Binance Smart Chain blockchain network and is entirely decentralized, which means there is no powerful central authority or single point of control. A unique committee of users is randomly and secretly selected to approve every block. Nodes are run by entities representing diverse backgrounds across many different countries.

## **Other Benefits Of The Binance Smart Chain**

### (a) PERMISSIONLESS

- Public & Open to All: Users do not need the approval of a trusted authority to use the Smart Chain blockchain. There is a single class of users and no gate keepers. Every participant can read every block and have the opportunity to write a transaction in a future block.

- Low Cost to Participate: The Binance Smart Chain requires minimal processing power and modest IT resources to join. All online users who possess BSC tokens are automatically eligible to participate in block consensus.

(b) OPEN SOURCE: The BSC node repository is open sourced and publicly available for anyone to audit, use, and build upon. The platform is founded on principles of transparency, inclusivity, and collaboration, and is maintained by a dedicated community with a shared vision of a decentralized, borderless future.
